	mechanism be needed in		
	future Virtual montings should	Likely to evolve in line with	No further action
	Virtual meetings should remain the norm, with	organisational way of working,	
ers	some physical meetings to	virtual meetings are considered	
Partners	maintain relationships	efficient and effective and	
Ра		physical meetings only required	
		for creative or difficult matters	

			1
	Gathering and controlling flow of information to partners/ Government improved during the pandemic: Consider how this function can be continued	The Hubs gather intelligence and submit reports weekly to BEIS and continue to develop local eco-systems with LAs and business intermediaries to help provide enriched data. How this information is then to be shared back with partners (two-way processes) needs to be explored further.	A process for Growth Hubs to gather and share information with and from partners needs to be explored further and as part of the evolution of the delivery model, relating in part to resource allocation and strategic aims
	Area Hubs do not provide feedback on businesses to referral partners: Implement a system that enables this	There are challenges to creating an automated feedback system; feedback relies largely on 1-2-1 interactions with referral partners	Ongoing relationship building and management with partners
	Peer Networks programme is funded annually so no sustainability built in: Consider options to continue newly formed groups beyond end date	The continuation of new business groups/networks is not funded nationally and will be reliant on local initiatives and resource	Area Hubs to continue to support businesses in their customer journey and consider how best to deploy allocated funding
Businesses	Demand for digital service delivery may continue post-pandemic: Hubs should consider lessons learnt and opportunities for efficiency improvements	Further discussions required to explore lessons learnt and opportunities arising for the experience of the pandemic	Further discussion required
	There is a risk of overloading the market with online support: Potential for increasing SELEP-wide programmes of online events should be investigated	Currently calendars of events are maintained on the Growth Hub websites. The coordination and development of SELEP-wide programmes would require further discussion	Further discussion required on feasibility and benefits
