

## OUR TECH SUCCESS STORIES

Student Name:  
**Davis Ayomah**

Course Studied:  
**AWS re/Start**

Course Start Date:  
**November 2021**

Davis recently completed our **AWS re/Start** course and has successfully used the skills and knowledge he has gained as a fully qualified AWS Cloud Practitioner alongside our employability workshops and opportunities to gain a position as a Technology Associate with Global IT Company, Infosys.

### Overview

We caught up with Davis at the end of his course and asked him a few details about his experience with Tech Talent Academy, our amazing trainers and how the course has helped him achieve his goals.

#### Why did you join the program?

“Aside the Technical Skills, the promise to connect graduates with employers was a major reason I joined the program.”

#### Had you ever considered a career in technology before joining the course?

“I am a tech enthusiast and I always keep tabs on new technology trends. I always wanted a career in technology and this course helped me learn web development, networking and cyber security. I strongly believe the knowledge acquired will help me deliver in my new role.”

“

TechTalent Academy was set up to solve two issues – one to create more diverse tech teams and the other to upskill and bring more people into the sector. We teach the skill set that industry needs and provide the opportunities for the many thousands of people who dream of working in tech.

”

Janice Rae  
CEO & Founder  
TechTalent Academy

#### Why are you excited about launching a new career in the tech space?

“Technology has impacted our lives positively, from saving lives by improving medicine, keeping us connected to each other, providing education and entertainment and many others. I am excited to have the opportunity to make a contribution that will impact the lives of other people positively.”

#### In the program, what topics were you most excited about? What did you find most challenging?

“The ability to deploy a network in the cloud along with accompanying infrastructure and configuration within minutes was really exciting for me. This is something that would usually take days or weeks if it were to be deployed locally. AWS has a lot of services and learning them was a bit challenging at first but they soon became familiar the more I used them.”

#### What technical and professional skills from the program are you using the most in your new role?

“Technical skills such as deploying and configuring AWS Services, Team work and presentation skills”

#### How has the program impacted you and your family (kids, parents, siblings, friends, other)? How has it impacted you professionally?

“Professionally I can now pursue my dream career. This course has also had a positive impact on me emotionally/mentally and I feel a lot more confident about myself and skills and I hope it only gets better.”

“I encourage any one who have the desire to learn through TTA to go for it because, it is worth it at the end.”

#### If you could describe the program in one word, what would you say? Why did you choose that word?

“Brilliant. It was a good idea to train and also connect students with employers”
